

# Mines and Mining Stocks

## MILL BUILDING AT MAZUMA, NEV.

Lots of Ore Ready for New Custom Plant—Record at Mazuma Hills Plant.

Mazuma, Nev., Jan. 7.—C. F. Floyd, the man who promoted the mill which is now under construction by the London syndicate, went out to Lovelock today to look after more material for the mill, which is closing up the tracks at the railroad terminus. Accompanying him was General Manager C. E. Morgan of the Bader Hills and Silver Peak properties. Before leaving Mr. Cieshorm gave Mr. Floyd the assurance that he could furnish the new mill with 1,000 tons of ore in six weeks from the Silver Peak alone. It will probably occupy that time to complete the mill, as that plant will start operations the very day that the stamps are ready to drop.

## COPPER STOCKS IN BOSTON AND NEW YORK

Following is the daily market comment of Paine, Webber & Co. Boston, together with the range of prices of copper stocks and other Boston listings in which the west is interested, as well as a similar report on New York curb transactions, by James A. Pollock & Co., and from which it is secured for use in this department of the Herald.

Boston, Jan. 8.—Extreme dullness was the order of the day. Certain specialties were active in New York, such as Smelter, Colorado Southern and Mexican Central, but there was no public following. The local market showed no change worthy of mention. United States Smelter was again the most active stock, but it was due to manipulation and attracted no attention. We are having a period of apathy which we think will be broken by a sharp drop. We know it is an old saying, "Never sell a dull market," but we feel that something will be done to attract the speculator and a sharp break would do it better than anything else.

## SHAREHOLDERS CALL A HALT

Minority Interests in Gem Consolidated Ask for Accounting and a Receiver.

The Gem Consolidated Mining company, with Hyman Tyree as president and W. L. Gallagher as secretary and treasurer, was yesterday made defendants in a suit brought in the Third district court by C. C. and W. W. Wylie, John Pingree, M. S. Browning, Adam Peterson, D. C. Eccles and M. S. Foss. The complaint alleges fraud in the incorporation and subsequent manipulation of the stock of the company. An accounting is demanded and in addition was to raise money for the purchase of other claims.

## DEEP WORK AT THE DALY-WEST

Cross-Cutting for Ledge and to Get Under Shaft on Drain Tunnel Level.

At the Daly-West company's property in Park City crosscutting from the Ontario drain tunnel' avenue is now progressing to a point directly under the bottom of the Daly-West shaft, and the opposite direction toward the ledge. The drift toward the shaft has been under way for more than a week, while the crosscut for the ledge was started two or three days ago.

While the distance from the drainage tunnel to the shaft is more than 40 feet, the management states that some considerable work has been encountered already and that the water in the bottom of the shaft is slowly draining. It would be possible to resume sinking right now, but it has been decided to wait a little while and see if the shaft will not completely drain itself and do away with the necessity of pumping at all.

The distance that will have to be covered in the opposite direction from the shaft to cut the vein on the drain tunnel level was not vouchsafed by the management, but the supposition is that the drain tunnel was headed for a point approximately midway between the shaft and the vein when it was extended into Daly-West territory. Copper company the Ontario and Daly mines. In other words, the ledge will likely be reached at the same time as the opposite crosscut reaches a point directly under the shaft.

There should be all kinds of good news coming from this selling, but it is the present year and some of it should be maturing before summer rolls around.

## NEVADA CONSOLIDATED IS OUT OF CUMBERLAND-ELY

A syndicate has been formed which has taken from the treasury of the Nevada Consolidated Copper company the remaining 125,000 shares of Cumberland-Ely stock at not far from the present market price, says the Boston News Bureau. This stock has been selling over the market for some time. In fact, 75,000 shares have already been sold in the open market, and this selling has actually had a depressing effect marketwise. The Nevada Consolidated sold the shares in order to finance an extension of the Steptoe smelter at mill.

The Nevada Consolidated company originally owned 200,000 shares of Cumberland-Ely stock and this selling in part payment when that company sold the Cumberland-Ely a one-half interest in the Steptoe reduction works for \$500,000.

One and bullion settlements in this city yesterday, as reported by McCormick & Co., amounted to \$125,000, as follows: Silver, lead, gold and copper ores, \$50,000; base bullion, \$75,000.

Las Vegas—Wilson Drug Co. Smelter—M. Hermet. Tonopah—T. A. Oldfather.

## MINING STOCK EXCHANGE.

Taken as a whole the local mining share market is behaving splendidly. Trading is not particularly heavy, but every attempt at a bear raid on any stock ends in failure. Prices may be lowered a few points, but it is not often that they can be held down through more than a call or two. Iron Blossom was traded in yesterday at prices ranging from \$2.30 to \$2.45, the higher prices having the best of the argument. What keeps this stock so strong is a mystery that cannot be fathomed. The Colorado Silver vein, for which the company is prospecting, has not yet been located, if reports are true, but for all that the price of the stock is well above some of the dividend paying issues. It takes nerve to buy at these prices; but then people without nerve have no business in the mining stock game.

During the two regular and open board calls a total of 100,256 shares of stock, with a selling value of \$1,615,555, changed hands. Following is the list of final quotations and record of sales made during the day:
